## Portfolio attributes

### Investment objectives

The Sub-Fund aims to provide investors with long term capital growth through investment in listed global real estate securities, primarily domiciled in developed markets. The Sub-Fund aims to achieve a total return that exceeds the performance indicator after fees, measured on a rolling three year basis.

### Investment policy

- The Sub-Fund will invest in a diversified portfolio of listed global real estate securities, primarily domiciled in developed markets.
- A concentrated portfolio of 30 to 60 investments.
- Holding real estate investment trusts (REITs) and property management and development companies.
- Up to 15% of the Sub-Fund may be invested in cash.
- The portfolio is actively managed and is not managed in reference to any benchmark, asset class restraints or a targeted return.

### Fund related risks

- Due to fluctuations of the market, and performance of individual companies, equity risk can impact funds.
- Changes in currency exchange rates may have an impact on the value of the fund.
- For full details of risks, please refer to the risk section in the Prospectus and KIID.

## ▶ Definitions

- 1) Total Investment Charges (TIC) are the sum of the Ongoing Charges and the Transaction Costs (TC) and are expressed as a percentage of the total fund on an annual, rolling basis.
- 2) TC relate to the buying and selling costs for the underlying assets of the fund and are a necessary expense in the administration of the fund. Neither the TIC nor the TC should be considered in isolation as all returns may be impacted by other factors over time, including but not limited to market movements, fund type and the decisions of the Investment Manager(s).
- 3) TIC & TC are calculated on an annual basis but are subject to change subject to any market changes throughout the year which may impact the funds' future TIC. Higher TIC does not necessarily equate a lower return, nor does a lower TIC equate to a better return. The TIC may change, and as such the current TIC may not be an accurate indication of the future TIC.
- 4) The ongoing charge is a measure of the actual expenses incurred in the management of the Classes of the Sub-Fund. The ongoing charge shown is expressed as a percentage of the monthly average value of the portfolio calculated over a 12- month period as at the date shown. The current on-going charge cannot be used as an indication of future ongoing fees. A higher on-going fee does not necessarily imply a poor return, nor does a low on-going fee imply a good return. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund.
- 5) The annualised total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of any reinvestment and dividend withholding tax.
